

TRAINING SERVICES + OUTREACH ACTIVITIES

PROJECT DESCRIPTION

BPS and the Ohio Department of Transportation's Local Technical Assistance Program agreed to update and expand the existing Safe Routes Academy course offerings to include a wider breadth of subject material related to active transportation. Developing new courses, revising existing courses, and rebranding the new Active Transportation Academy was involved in this process over the course of this contract.

It was important that BPS understood that the program must continue to offer and teach existing course offerings to provide a coordinated and uninterrupted transition while new courses were being developed, so BPS agreed to provide course instruction and program promotion for the existing Safe Routes Academy courses, as well.

Steps in this process included:

Step 1: Course Instruction

Step 2: Program Promotion

PRIMARY CLIENT

Ohio Department of Transportation (ODOT)

STATUS

In-progress

ROLE

Training Services & Outreach Activities

RESPONSIBILITIES

New courses development, revising existing courses, rebranding the new Active Transportation Academy, & course instruction
