

HAZARD MITIGATION PLANNING

Hazard mitigation planning is critical to ensuring communities are prepared for disasters. BPS is exceptionally qualified to update existing or create new plans that incorporate all hazards.

OUR HAZARD MITIGATION EXPERIENCE

BPS has completed and is currently preparing 11 hazard mitigation plans for counties all throughout Ohio. In addition, BPS is preparing a multi-county hazard mitigation plan for West Virginia Region I.

HAZARD MITIGATION PLANNING CAPABILITIES

We have the capabilities to perform all aspects of developing a hazard mitigation plan, including:

- History & demographics
- Planning process & public involvement
- Hazard risk assessments
- Hazus GIS modeling (Levels 1 & 2)
- Hazard mitigation goals & actions
- Plan schedule & maintenance
- Administration (local match tracking, SHARPP reporting, etc.)

WHO WE ARE

Burton Planning Services (BPS) was formed in 2008 by company President, Kimberly Burton, and is based out of Westerville, Ohio. Our mission is to provide clients with sustainable solutions that are timely, affordable, and customized for the client's specific needs. BPS has a multi-disciplinary professional staff, including planners, engineers, and environmental specialists. We value being a small business because it enables us to be more flexible and adaptable for our clients. We operate without a large overhead, so we can offer lower-cost services; and we do not have intermediary sales people – our professional staff work directly with our clients from start to finish.

WHAT WE DO

Our in-house hazard mitigation team offers a full range of skillsets for preparing hazard mitigation plans. BPS understands the importance of staying current with federal and state regulations and requirements in order to provide high-quality plans with customized mitigation strategies. We also incorporate public concerns so that the plans best address the priorities of the public and educate residents on local hazards.

OUR APPROACH

- ★ **Customized:** all communities are unique, so our work is customized to represent your community's specific mitigation needs and goals.
- ★ **Implementable:** a disconnect often occurs between planning and implementation, so we work with your county to develop a set of customized mitigation actions that are implementation-oriented.
- ★ **Comprehensive:** the hazards that threaten each community might change over time, so we consider a comprehensive range of hazards for our clients to ensure that all possible factors are accounted for and geared specifically for the county we are assisting, including natural, technological, and man-made hazards.

Kimberly Burton, P.E., AICP CTP, LEED AP ND | *President*

Ms. Burton is the President of BPS and has over 20 years of experience in hazard mitigation, community & transportation planning, and environmental studies. She has completed numerous county-wide hazard mitigation plans in Ohio, both for BPS and in her role as an Associate Professor of Practice for the Ohio State University. Outside of Ohio, she has also collaborated on several resiliency and natural hazard mitigation efforts, including for Franklin TN, U.S. Virgin Islands, and Belize.

Brett Morris, LEED Green Associate | *Associate Planner*

Mr. Morris is an Associate Planner who specializes in Geographic Information Systems (GIS). He is certified as an LEED Green Associate. Mr. Morris is skilled at completing Level 1 and Level 2 Hazus analyses to estimate potential damages to buildings and crops, as well as coordinating with stakeholder and public meeting events. He has prepared county-wide hazard mitigation plans for eight counties throughout Ohio.

Ruchi Agarwal | *Associate Planner*

Ms. Agarwal is an Associate Planner with specialization in community planning and engagement. She also has experience managing projects, performing data analysis and mapping, and conducting sustainability, transportation, and land use planning. She is especially skilled in gathering community feedback and translating the results into visual, easily-understood products. She has conducted public engagement events as well as supported the development of hazard mitigation plans for three counties in Ohio.

Elvin Pinckney | *Senior Environmental Specialist*

Mr. Pinckney is a Senior Environmental Specialist with over 40 years of experience in federal and state-level environmental studies and public involvement. Mr. Pinckney is an expert at engaging stakeholders and members of the public. Throughout his career, he has coordinated and participated in numerous public meetings, including for hazard mitigation planning efforts.
