

DRONE AERIAL IMAGERY COLLECTION

CITY OF WESTERVILLE

LOCATION

City of Westerville, Ohio

TASKS

Aerial Imagery Collection
Imagery Processing

HIGHLIGHTS

Operated drone in selected locations to capture imagery
Collected still images and video
Processed imagery to enhance quality

PROJECT DESCRIPTION

The City of Westerville requested aerial imagery at several sites throughout the city. The City sought a combination of still photography and video clips that highlighted integral components of the city, such as Otterbein University, Historic Uptown Westerville, the Central College area, and future development opportunities near Polaris Parkway. These images and videos were to be used to assist economic development initiatives by the city.

BPS staff identified the locations, determined the safety of flying in the area, and captured high-resolution images and video of each site. The images were further refined by BPS staff using software to enhance the quality.
