### HIGHLIGHTS

Customized branding for training

Identified learning objectives, prepared content, and developed knowledge checks

Developed courses & published in Storyline

### PROJECT DESCRIPTION

Transportation agencies receiving federal funding must comply with nondiscrimination and accessibility mandates. The ADA & Title VI for Local Public Agencies e-learning course series provides on-demand training to familiarize staff of local public agencies in Ohio with nondiscrimination compliance requirements, including considerations of the Americans with Disabilities Act, Title VI of the Civil Rights Act, Limited English Proficiency, and Environmental Justice. For the series, BPS developed three courses: 1-Principles, 2-Requirements, and 3-Implementation.

The e-learning series covers the relevant regulatory framework, ADA self-evaluations and Transition Plans, guidelines for accessible design, Title VI Plans, including Limited English Proficiency, implementation, and grievance procedures, and considerations for compliance with Environmental Justice mandates. The target audience for this series includes planners, engineers, public service directors, lead workers, administrators, finance, and human resources staff from Local Public Agencies across Ohio. Regional planning agencies, counties, cities, villages, and townships will benefit from taking this course.

The needs of learners with visual or hearing impairments were considered for the design of the courses. Colors and fonts follow Section 508 of the Rehabilitation Act guidelines. BPS facilitated the 2-hour live training and discussion over Zoom and provided the slides, supplemental handouts, and a video recording for future reference and use to Planning Commission members.
