

SNOW REMOVAL TOOLKIT

OHIO DEPARTMENT OF TRANSPORTATION

LOCATION

Statewide, Ohio

TASKS

Winter Management Plan Best Practices Review

Snow And Ice Clearance Best Practices For Sidewalks And Bicycle Facilities

Customizable Resource Development

HIGHLIGHTS

Developed statewide guidance document

Created customizable media resources for local jurisdictions

Animated an educational video about snow removal

PROJECT DESCRIPTION

Burton Planning Services led a team to develop a pedestrian and bicycle facility snow and ice removal toolkit focused on local jurisdictions for the Ohio Department of Transportation. This included summarizing best practices for winter management plans and developing best practices for sidewalk snow clearance ordinances.

BPS additionally coordinated the development of customizable print and social media resources to raise awareness of the importance of sidewalk snow clearance, including two one-minute animated videos. The consultant team presented the products of the project on a statewide webinar.
